

NBS Workstation Requirements

■ Client (PC) Sizing – Minimums per Oracle

	<u>Windows 98/NT/2000/XP</u>
CPU	Pentium 200 MHz or greater
Memory	64-96 MB

NOTE:

10-20% of NIH users will need **better** than Oracle's minimum configuration.

■ Client (PC) Sizing – Minimums per Experience

	<u>Windows 98/NT/2000/XP</u>
CPU	Pentium 400 MHz or greater
Memory	256 MB or greater (512 MB recommended)

Minimums Basis:

Oracle 'minimum' recommendations are NOT sufficient to meet client/user acceptance criteria.

Includes assumption that typical users will also utilize other desktop applications such as MS Outlook and one or more MS Office Applications.

Minimums do not apply to 'casual', portal users, such as 'travelers' anticipated to provide electronic signatures through the NIH portal.
